

I am writing concerning the new broadcast service LPFM. I recently received a letter telling me about some of the effects it would have on my current choice of radio. I currently listen to KLove radio and have for over seven years. I have found it to be a peaceful place that I can listen and not be offended by things I hear. I believe the LPFM would jeopardize this signal if it were allowed to continue. This would not be a good thing for me. I found that when I lose the signal and have to resort back to local radio station other than KLove I can not stand to listen to them so I turn off the radio until I receive the signal again. I believe that KLove serves a great purpose through the area that I live in. I have seen and heard others enjoying this radio station. I believe that this is a radio station that is worth having on the air. Please consider the people that listen to such radio stations as KLOVE and the impact you will have if you were to take that right away from me and the others that listen in. Thank you
